Professional Experience

Youth Employment Agency, Riviera Bonoumin   Jan. 2023 - Present
Fullstack Developer

- Optimized data entry, tracking, and processing of job seeker complaints with a complaint management application, while integrating a user satisfaction feedback system.
- Streamlined profile search among nearly a million job seekers in the database, for offers managed by the Youth Employment Agency, through a user-friendly and intuitive platform. This platform also enables efficient data and CV extraction.
- Revamped the user interface and deployed the mobile application for the Youth Employment Agency, now used by over 13,000 beneficiaries to access its services.

Technologies and Tools: PHP | Laravel | PHPUnit | Bootstrap | Alpine JS | JavaScript | MySQL | Flutter, CentOS | Git & Github actions | MySQL

FX_LABS SARL, Riviera 2   May 2021 - Dec. 2022
Web Developer

- Ensured maintenance, addition, and enhancement of features for the Quorum Enligne project, a web application dedicated to managing general meetings of companies listed on the BRVM.
- Automated the analysis and processing of shareholder lists with more than 10,000 lines.
- Designed and developed a web application for simulating gross salary, comparing salaries among users with similar profiles to detect cases of underpayment.

Technologies & Tools: Python | Pandas | Anaconda | PHP | Laravel | Bootstrap | Alpine JS | JavaScript | MySQL | Ubuntu | Bitbucket

Education

CEFIVE (CENTER FOR COMPUTER TRAINING AND VISUAL TEACHING STUDIES)   Feb. 2024 - Present
Computer Design Engineering
